## Claims

This listing of claims will replace all prior versions and listings of claims in the application:

## Listing of the Claims:

- 1-9. (Canceled)
- 10. (Previously Presented) A complex of a ligand and a polypeptide, wherein the polypeptide comprises the isolated amino acid sequence selected from (i) the amino acids 40-60 of SEQ ID NO:7 (mouse synaptotagmin II botulinum toxin serotype B (BoNT/B)-binding domain) and (ii) the amino acids 40-60 of SEQ ID NO:9 (rat synaptotagmin II botulinum toxin serotype B (BoNT/B)-binding domain), wherein the ligand is BoNT/B and binds to the polypeptide at amino acids 40 to 60 of SEQ ID NO:7 or SEQ ID NO:9.
  - 11-41. (Canceled)
- (Previously Presented) The complex of claim 10, wherein the polypeptide is a synthetic or recombinant peptide.
- (Previously Presented) The complex of claim 10, wherein the polypeptide comprises a luminal domain of the rat or mouse synaptotagmin II.
- (Previously Presented) The complex of claim 42, wherein the polypeptide consists of the BoNT/B-binding domain and optionally further consists of an affinity tag.
  - 45-46. (Canceled)
- 47. (Previously Presented) A complex of a ligand and a polypeptide, wherein the polypeptide comprises the amino acid sequence (i) the amino acids 40 to 60 of SEQ ID NO:7 (mouse synaptotagmin II botulinum toxin scrotype B (BoNT/B)-binding domain) or (ii) the amino acids 40 to 60 of SEQ ID NO:9 (rat synaptotagmin II botulinum toxin scrotype B (BoNT/B)-binding domain), wherein the ligand is an antibody that binds to the polypeptide at amino acids 40 to 60 of SEQ ID NO:7 or SEQ ID NO:9 and reduces binding of BoNT/B to the polypeptide, and wherein the complex is located *in vivo* in a mammal.

U.S. Patent Appn. 10/695,577 Response to 2011/04/29 NonFinal Office Action

- (Previously Presented) The complex of claim 10, wherein the polypeptide further comprises a binding site for a ganglioside.
- (Previously Presented) The complex of claim 47, wherein the polypeptide is a recombinant polypeptide.

50-68. (Canceled)

- 69. (Previously Presented) A complex of a ligand and a polypeptide, wherein the polypeptide comprises the amino acid sequence selected from (i) the amino acids 40-60 of SEQ ID NO:7 (mouse synaptotagmin II botulinum toxin serotype B (BoNT/B)-binding domain) and (ii) the amino acids 40-60 of SEQ ID NO:9 (rat synaptotagmin II botulinum toxin serotype B (BoNT/B)-binding domain), wherein the ligand is an antibody against said amino acid sequence, and binds to the polypeptide at amino acids 40 to 60 of SEQ ID NO:7 or SEQ ID NO:9, thereby reducing binding of BoNT/B to the polypeptide.
- (Previously Presented) The complex of claim 69, wherein the polypeptide further comprises a binding site for a ganglioside.
